

case study:

APA Group

Tenix provides construction services to its APA Group's distribution network serving parts of south east Queensland.

This includes extension of the polyethylene systems, steel pipelines and a renewal (replacement) program of the old inner Brisbane gas pipe system.

Key Features & Outcomes

Tenix provides management reporting and supporting systems for this contract.

This service was provided for the Allgas contract to implement a mobilisation plan and to take over from the previous contractor. Under the contract:

- Tenix delivers innovation and cost savings to APA
- Tenix maintains full financial visibility of the actual cost of performing works.
- Tenix and APA Allgas work collaboratively to generate outcome that benefit both parties

Our Role

Installation of all mains and services on the Gold Coast, as well as mains renewals in inner Brisbane city. Approximately 2,000 new residential connections are made per annum, with an expected mains renewals programme of 50km per annum.

Tenix also provides training and education through the well recognised National Training Program.
